East Central Illinois Area Agency on Aging, Inc.

FLIP THE SCRIPT ON AGING: MAY 2025

East Central Illinois Area Agency on Aging

### **Mission Statement**

Who We Are, What We Do, and Who We Serve

Our mission is to lead and advocate for inclusive resources and services that empower the optimal aging of East Central Illinois' diverse older adults, individuals with disabilities, and their care partners.

Serving Champaign, Clark, Coles, Cumberland, DeWitt, Douglas, Edgar, Ford, Iroquois, Livingston, Macon, McLean, Moultrie, Piatt, Shelby and Vermilion Counites (PSA 05).

# VISION STATEMENT

Action oriented direction that responds to the mission and is future thinking

### To optimize aging through innovative personcentered services in East Central Illinois.

# **CORE PRINCIPLES**

Statements with measurable outputs to guide organizational behavior

### Principle 1: Lead

We are committed to leading through collaborative planning, effective communication and oversight, advocacy, and innovative service development to meet the diverse needs of those we serve.

### Principle 2: Advocate

We are committed to optimal aging through advocacy that is person-centered, supported by public policy, and provided by adequately funded services.

### Principle 3: Innovate

We are committed to encouraging, valuing, and supporting new and creative service ideas that meet the needs of those we serve.

### Principle 4: Collaborate

We are committed to strengthening programs and services through inclusive and diverse community partnerships.

### ECIAAA Services Funded Through The Older Americans Act

The Older Americans Act (OAA) was last reauthorized in 2020 and is up for reauthorization in 2025.

### What happens next, and what can you do? If we want legislation to pass on the Older Americans Act, we need to continue educating representatives about why OAA services and strategies are important.

Introduction

East Central Illinois Area Agency on Aging, Inc. contracted with Polco, a powerful community engagement and data insights platform designed to help organizations better understand and respond to the needs of their communities, to conduct a 16-county area wide Community Assessment Survey for Older Adults (CASOA)<sup>®</sup>. The CASOA<sup>®</sup> provides a statistically valid survey of the strengths and needs of older adults as reported by older adults themselves. This report is intended to enable local governments, community-based organizations, the private sector and other community members to understand more thoroughly and predict more accurately the services and resources required to serve an aging population. With this data, community stakeholders can shape public policy, educate the public and assist communities and organizations in their efforts to sustain a high quality of life for older adults.

Survey Objectives

- Identify community strengths to support successful aging.
- Articulate the specific needs of older adults in the community.
- Estimate contributions made by older adults to the community.
- Develop estimates and projections of resident need in the future.

Survey Method

The CASOA<sup>®</sup> survey instrument and its administration are standardized to assure highquality survey methods and comparable results across communities. Two methods were used to solicit survey responses among the 16-county service area: A random sample mailed survey and an open participation survey. The open participation survey results were combined with responses from the probability sample survey, for a total of 1,653 completed surveys, providing an overall response rate of 8% and a margin of error plus or minus 2 around any given percent and one point around any given average rating for the entire sample (e.g., average number of caregiving hours). Results were statistically weighted to reflect the proper demographic composition of older adults in the entire community.

# Survey Sample & Collection

ECIAAA Community Assessment Survey for Older Adults (CASOA®)

- 22,400 invitations sent (1,400 per county)
- Age range targeted: 50-100
- 801 invitations undeliverable (3.5%)
- 1,653 completed surveys (8%)

The figure above shows the percent of respondents who reported that one or more items within each of these 17 areas was a major or moderate problem.

# Benchmark Comparíson Data

National Research Center at Polco has developed a database that collates responses to CASOA<sup>®</sup> and related surveys administered in other communities, which allows the results from East Central Illinois Area Agency on Aging to be compared against a set of national benchmarks. This benchmarking database includes responses from more than 35,000 older adults (age 55 and over) in over 344 communities across the nation.

The results of this exploration will provide useful information for planning and resource development as well as strengthen advocacy efforts and stakeholder engagement. The ultimate goal of the assessment is to create empowered communities that support vibrant older adult populations.

# Community Dimensions

This report summarizes how older residents view their community and its success in creating a thriving environment for older adults. Aspects of livability are explored within six community dimensions:

- 1. Community Design
- 2. Employment and Finances
- 3. Equity and Inclusivity
- 4. Health and Wellness
- 5. Information and Assistance
- 6. Productive Activities

Overall community quality also is assessed.

Overall Community Quality

### Domain of Community Livability

#### Description

Measuring community livability starts with assessing the quality of life of those who live there, and ensuring that the community is attractive, accessible, and welcoming to residents of all ages.
